Masterclass in Cardiac Amyloidosis: Disease Spectrum, Diagnosis and Management

Announcer:

Welcome to CME on ReachMD. This preview of the upcoming live sessions titled “Masterclass in Cardiac Amyloidosis: Disease Spectrum, Diagnosis and Management” is Provided by the American Society of Nuclear Cardiology and is supported by an unrestricted educational grant from Pfizer.

Announcer:

Would you be able to suspect Cardiac Amyloidosis in your patient?

Would you know what to do?

How will you ensure proper care for your patient with Cardiac Amyloidosis?

Dr. Malhotra:

Hello, I am Saurabh Malhotra, Director of the Cardiac Amyloidosis program at Cook County Health in Chicago. I'd like to invite you to a new exciting program aimed to sharpen your knowledge and skills for suspecting, diagnosing and treating Cardiac Amyloidosis.

Please join me on June 2-4, 2023, for the first-ever Masterclass in Cardiac Amyloidosis, brought to you by the American Society of Nuclear Cardiology. This Masterclass will consist of five, two and a half hour sessions, held virtually, and is designed for medical professionals envisioning to become champions in amyloidosis at their institutions.

This Masterclass in Cardiac Amyloidosis is for you if you are a primary care physician, general cardiologist, heart failure specialist, nuclear cardiologist, multimodality imager, hematologist, neurologist, nurse practitioner, or physician assistant.

Management of patients with amyloidosis is rapidly evolving. This Masterclass offers you the opportunity to learn from international experts with vast experience in amyloidosis, who will share their insights, strategies, and best practices to help you navigate the care of your patients with amyloidosis.

In this Masterclass, you will learn how and in whom the disease manifests, which tests to order, performance and interpretation of diagnostic tests, mistakes you must avoid in diagnosis and management, and how to facilitate patient referral and timely treatment.

Get answers to all those challenging questions that keep you up at night and become a part of the community providing appropriate and timely care for these patients. I encourage you and your multidisciplinary care team to learn the best practices across the spectrum of care for patients with amyloidosis.

Reserve your seat at the ASNC Masterclass in Cardiac Amyloidosis. I look forward to seeing you in June.

Announcer:

ASNC's Virtual Masterclass in Cardiac Amyloidosis is complimentary for all learners. Register yourself and your colleagues at ASNC.org/Masterclass
