Switching the Setting of Gynecological Procedures

Narrator:

Is minimally invasive surgery, or MIS, right for your practice and patients?

Consider that it's less intimidating for patients to walk into an office with a staff they already know vs. going to a hospital.

While clinicians have more control over the surgical environment, offering significant cost reductions.

Not to mention the time saved for both you and your patients.

Learn about these benefits and more by visiting www.ReachMD.com/womenshealthupdate.
